

The Reinvent Your Enterprise Action Planning Workshop

Powered by the Strategic Profiling project acceleration tool

INTRODUCTION

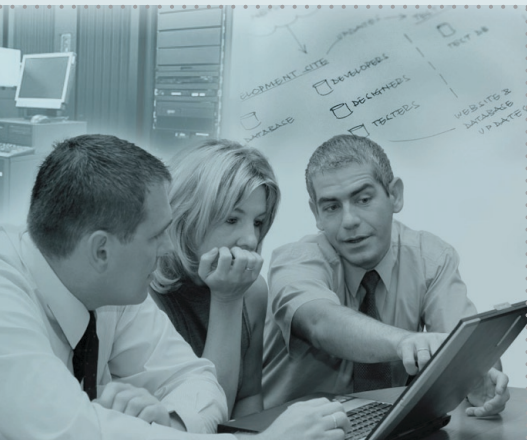

In today's fast-changing world, companies need a better way to improve and accelerate business project results.

The BV Consulting Group, featured by The Drucker Institute as the first company to be built upon knowledge work productivity principles, has systematically developed a better way to help companies and project teams accelerate and improve their results.

The Action Planning workshop will help you improve your business projects in a fraction of the time.

The steps are:

- Define success for your *Action Planning* workshop and sign up your team.
- Complete the *Strategic Profiling* online group survey, and review key concepts from the book *Reinvent Your Enterprise*.
- Participate in the *Action Planning* workshop to rapidly create an integrated action plan for your business project.
- By the end of the workshop, you will walk away with a shared and integrated plan for where your project needs to go and why, what key things need to get done and when, how to best do those things, and who will be responsible for which tasks.
- For future initiatives, you will be able to apply *Action Planning* techniques with increasing speed to start and finish all of your business projects better, faster, and less expensively.

Action Planning accelerates enterprise projects by improving knowledge work productivity.

The Action Planning Workshop helps organizations accelerate and improve key business initiatives and their results.

A Different Approach

The Action Planning workshop is integrated with the Strategic Profiling online project acceleration tool, incorporating decades of cross-disciplinary research and organizational experience to produce better and faster results. While other surveys such as Myers Briggs® do a good job of helping individuals identify and define their personality types, the results are often hard to apply to business and technology projects. The Action Planning workshop, integrated with the Strategic Profiling tool, works better and faster to implement your key business initiatives.

Action Planning Workshop

The Benefits

Through the *Action Planning* workshop, your team will successfully achieve four key results:

- 1) **A high level action plan** to get your project started, get it back on track, or solve an immediate problem faster.
- 2) **A better approach to accelerate decision-making** for the key success and risk factors at the individual, group, and organizational levels.
- 3) **More effective integration and execution** with teams taking full advantage of their strengths, and how to best leverage them.
- 4) **Better governance management**, to set a course that is more strategic and also more productive operationally.

You can make your business projects more successful using the *Action Planning* workshop and the *Strategic Profiling* tool. It is the most productive way to get your key initiatives started, or if they have already started, get them accelerated and solve your most important organizational stumbling blocks.

The individual version of *Strategic Profiling* can be taken free of charge at www.StrategicProfiling.com

Instrument Features	Myers-Briggs Type Indicator®	Strategic Profiling® Individual Version	Strategic Profiling® Group Version
